The Horizon is a student-produced newspaper, published weekly during the fall and spring semesters. Editors must be enrolled in at least three credit hours and are paid through a stipend. To report a story idea or obtain information, call 941-2253 or e-mail horizon@ius.edu.

The Horizon is not an official publication of Indiana University Southeast and therefore does not necessarily reflect its views.

The Horizon is partially funded by Student Activity Fees

The Horizon is a member of the Indiana Collegiate Press Association, Hoosier State Press Association, and the Associated Collegiate Press.

...

The Horizon welcomes letters on all subjects. Send them to this address:

The Horizon IU Southeast 4201 Grant Line Rd. New Albany, Ind. 47150

Letters may also be sent by e-mail: horizon@ius.edu

Letters must be signed, include student's major or class standing, and be fewer than 300 words. The Horizon reserves the right to edit for brevity, grammar, and style, and may limit frequent letter writers.

More programs possible

CONTINUED FROM PAGE 1

that will be held in the new center and in the Physical Science Building, classes will still be held in the Hausfeldt Building, just south of the IUS campus.

Although many classes are moving to the new location, Schaffer has a long-term goal that heavily involves IU Southeast.

"The long-term plan is to have a [Purdue University] School of Education and Technology Building at IUS," Schaffer said.

The Purdue University College of Technology at New Albany currently offers five programs that allow students to earn a Purdue University degree.

The programs are computer graphics technology, electrical engineering technology, industrial technology, mechanical engineering technology and organizational leadership and supervision. Both bachelor's and associate's degrees are currently available in the organizational leadership and supervision program.

As of Sept. 17, the Purdue University College of Technology at New Albany was awaiting approval of three more of their programs to become bachelor's degree programs.

They were supposed to have known by Sept. 14 whether or not these programs were going to be approved.

"I guess no news is good news," Schaffer said.

If the three programs are approved, students will be able to earn both their associate's and bachelor's degrees in electrical engineering technology, mechanical engineering technology and computer graphics technology. In addition to the New Albany campus, the Purdue University College of Technology also has campuses in Kokomo, South Bend, Lafayette, Muncie, Anderson, Indianapolis, Richmond, Columbus and Greensburg, Ind.

There are about 180 students enrolled at the Purdue University College of Technology at New Albany.

Schaffer said if the afore-

mentioned programs are approved to become bachelor's degree programs, enrollment should increase.

In addition, there is more recruiting going on at local high schools and the new building is getting a decent amount of publicity. Schaffer hopes all of this will result in higher enrollment numbers. "My primary job is to help people understand that you can get a Purdue degree at IUS," Schaffer said.

Although many IUS students may not recognize it, the Purdue University College of Technology and IU Southeast operate in close quarters. The Purdue students take all of their basic courses at IU Southeast and Schaffer said he would like

'Both institutions stand to gain from interaction among their students.'

Andy Schaffer
PUCTNA
director

to encourage IUS students to take some of the Purdue classes as electives.

"Both institutions stand to gain from interaction among their students," Schaffer said.

Shyness

Connection researched between shyness, anger

this very, very small portion of shy people become violent and what makes them manifest these feelings into hatred and anger."

Carducci does not plan to stop the research at this point. He would like to study younger individuals

and how they interact.

"I'd like to see if we can find a similar sort of expression in maybe preschool or middle school kids," he said.

Anger prevention is something that Carducci has contemplated, but he wonders how effective prevention can be.

"I don't know if we can prevent these types of school shootings, but I think we can work on how to keep people from getting picked on," he said.

"I think we can help kids become more social and to get involved."

"We need to think about how we can help kids con-

nect," he said. "I think that would be very critical."

Carducci encourages anyone that has trouble coping with their shyness to come visit The Shyness Research Institute.

"We have all kinds of methods to help people understand and deal with their shyness," he said.

Intramurals

Sign-up deadline approaches

to keep students involved is through the Intramural Sports Council.

The Intramural Sports Council is a way for students to contribute ideas about new events they would like to see offered or to give suggestions about how to make the program better. The council meets on the third Thursday of every month at 12:15 pm in the IUS Library, room 230.

Brown said students need not be an official member of the council to voice their opinions.

"It's open to everybody," he said.

Brown also created the All Sports Championship. Student groups can form teams of 10-15 people to compete in every event offered. They get points for each participant and for how well they perform. At the end of the year, the team with the most points

in each gender division is awarded the "Grenadier Cup."

"It gives the organizations something to look forward to at the end of the year," Brown said.

Last year's winners were, for the male division, from Tau Kappa Epsilon and, for the female division, from Zeta Phi Beta.

In addition, athlete of the year awards are given to the male and female who have the most points at the end of the year.

Students interested in becoming involved in intramural activities can either form their own teams for events or enroll as "free agents" and will be placed on teams by the Athletic Department. Roster sheets, free agent forms and a calendar of the dates when rosters are due can be picked up in the athletic office in the Activities Building, or can be printed from the athletic depart-

ment's website.

The Department is still accepting entries for all activities except the golf scramble and flag football.

The Grenadier Golf Tournament was held on Sept. 7 at Cherry Valley Golf Course in New Albany. Kevin Tumey and Jacob Kroff won the two-man scramble.

Rosters were due for flag football on Sept. 14.

Rosters for dodgeball are due Wednesday, Sept. 28.

Brown said that the numbers of participants for these two events have confirmed that there is more interest in intramurals this year than in years past.

There were 20 participants in the golf scramble this year. Last year there were 12.

Eight teams turned in rosters for flag football this year as opposed to three last year.

Sports Information Director Joe Glover said

that although the numbers aren't in yet, he can tell that there is more interest for the other activities as well.

"More people are hitting the website. More people have been in the building," he said. "It's impressive just to see the difference in traffic."

Mrozowski said that the program is going to have to adjust to the growing demand. For example, they plan to have separate scoring tables for each intramural basketball court.

"The demand is such that the only way we're going to be able to meet it is to play two games at once, and that is so different," he said.

He said that he is pleased that more students are taking advantage of the benefits intramurals offer.

"I think athletics in general teaches a lot of positive values that come into life, and intramurals carry a lot of the same things," he said.

SGA

Parking appeals court nears

will be asked to give a donation to get a ticket. All donations will be given to the IUS Children's Center.

The rest of the bill appropriated \$210.16 for gift cards and thumb drives for a giveaway, and helium for balloons.

In other business at the meeting, three senators were promoted from their probationary status. Leah Balmer, biology graduate student, Joshua Sesar, secondary education freshman and Jacob Korff, environmental conservation junior.

Balmer was also nominated and confirmed for the treasurer's position.

Gonya said Balmer was a good fit because of her financial background.

Parking appeals were also mentioned at the meeting.

Sandy Turpin, SGA chief justice and general studies senior, said student parking appeals would be on Oct. 2 from 3 p.m. to 4 p.m. in the Library, room 230.

Gonya said she expects parking to be an issue for the next few weeks.

"With the parking situation, I'd imagine the judicial department would be kind of lenient, simply because it's a mess out there," Gonya said. "We didn't have enforcement [for parking], then there were warning tickets, then there was enforcement."

YouTube? O RLY???

Ya, RLY.
The Horizon has an editor's podcast online.
