

Total Sulfur Deposition
in Kilotonne, 1978

In Circles,
Percentage of Total Sulfur
Deposition Due to
Cross-Border Transport

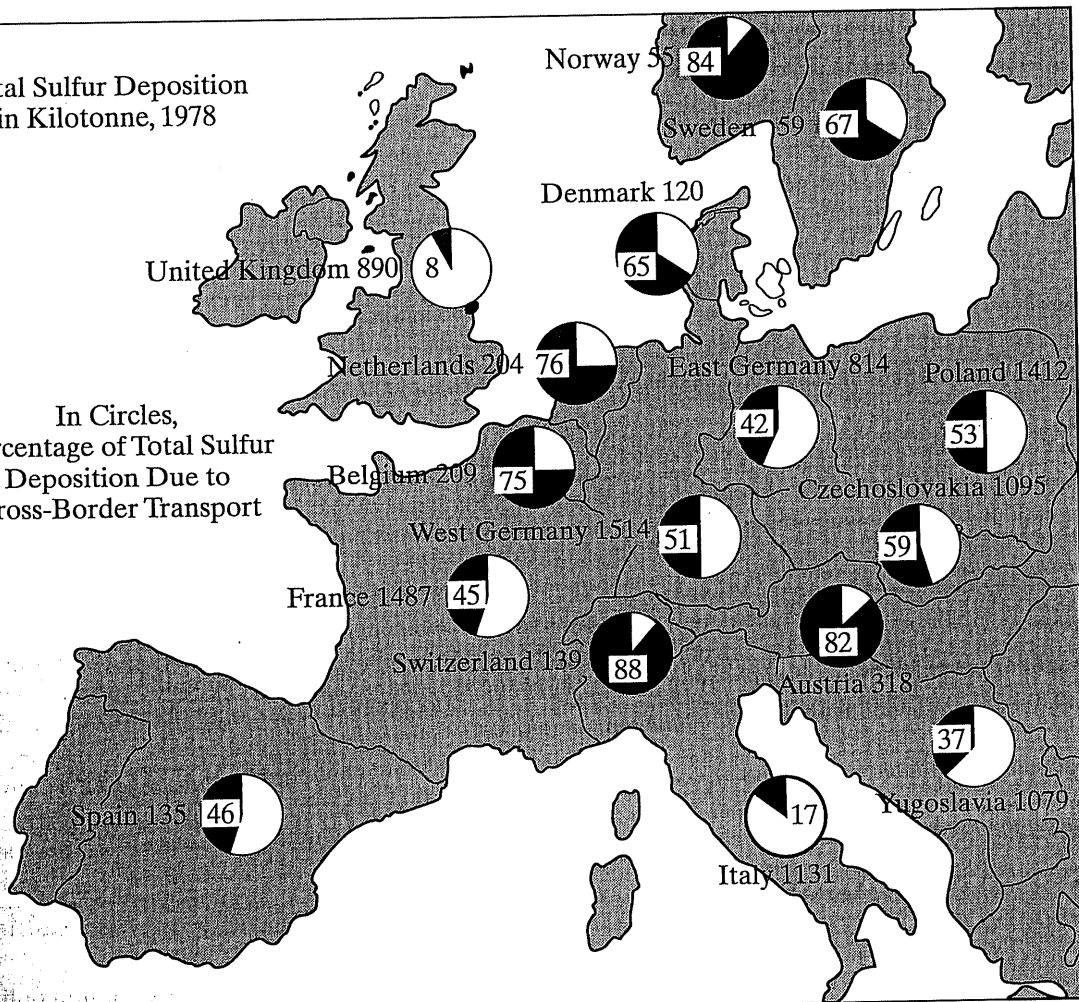

FIGURE 14.7

The boundary of a country is no defense against sulfur deposition. The countries in Europe are shown with the measured deposition of sulfur in kilotonnes. The circles show how large a percentage of this total came from outside (black) or inside (white) the country. (Adapted by permission of the Spiegel-Verlag from a figure in *Der Spiegel*, 1981.)
